Current Asset Ratio	2.16	2.56	18.5
Net Income per share	\$0.48	\$1.16	141.6

TECHNICAL ANALYSIS - Technical Diagnosis – Moving averages give a good indication of the vitality of the share in the long run. Since January 2014 the share price has been in an upward direction and moving averages have tracked the share price with its 200 Day Moving Average on a steep incline. The share price seems to bounce of its support level at the 50 Day Moving Average. Last month's candlestick has seen initial consolidation but has been the rise since 16 January. Despite the bearish candlestick on the 21 January it had reached a high for the day of \$39.8. A bullish engulfing candlestick appeared on 22. The share price retraced back to a level I consider to be value and I bought 181 shares at \$36.09 on 27 January **Please note this analysis is not advice but interpretation of potential market moves. Past performance is no guide to the future.** Share Reviewed on 27 Jan 2015 \$36.09 Current Price 16 February 2015 £39.73
