

The Power of the Technical Indicator the TTM Squeeze

What the TTM Squeeze is a momentum indicator that's basically the direction that the stock is going to the downside or upside. Overall shows the momentum in that direction.
 A mixture of Bollinger Bands and Keltner Channels
 The 2 indicators that make up the TTM squeeze
 The Bollinger Bands and the Keltner channels
 On the TTM Squeeze few colour dots

Dot Colour	Interpretation – What the Dots mean			
Red – in a squeeze	When the red dots come into play, Bollinger bands curls to the inside of the Keltner Channels			
Black- Squeeze is opening up	Bollinger Bands curls to the outside of the Keltner Channels. Expect a move that the squeeze is firing			
Orange (Rare) In a squeeze – A big move is coming	Bollinger Bands and Keltner Channels very very tight . There is a move about to come. Depending on the tight squeeze and the colour of the bars in the squeeze will give a good indication on the likely break out direction of the stock. When you see an orange squeeze you know there's going to be a bigger move to come.			
Green – Squeeze has Fired	The Squeeze is now firing			
Hollow Bars	Interpretation on the momentum bars			
Light Blue Cyan	Indicates Buying Momentum, Buying Pressure – Strong Buying Momentum. As bars get bigger over time you have buying momentum over time and vice versa. The stock starts to rise in price as the Cyan bars gets larger.			
Dark Blue	Buying pressure might be easing up . Buying momentum is dying down– Time to take profits. Stock price starts to consolidate or pulls back to the downside. When Dark blue happens stock starts to pull back. Shrinking Dark Blue bars means losing buyers momentum. Options – Whenever your in a call and you see dark blue bars coming in from the squeeze more than likely taking the profits just after using the squeeze for so long . Dark Blue bars indicating a possible pull back is coming. Stock buying pressure is easing up and people taking their profits.			
Red	Is basically indicating selling pressure. Strong selling momentum. Selling momentum increasing with the deeper red bars selling momentum is picking up. More sellers than buyers. Options - When we see Red we know that we can go for puts or just not enter the trade. Following to take puts on the red colour wave			
Yellow	Selling momentum is dying down. Selling pressure is easing up and Buyers are coming back into the market and steeping back in. As the yellow bars shrink selling momentum is dying down and the buyers are jumping back in. Not as much selling going as before. Notice as price goes back up we go from the yellow to the light blue.			
Cycle of momentum	Light Blue	Dark Blue	Red	Yellow
Order Light Blue Dark Blue Red Yellow Light Blue	Indicates Buying Momentum, Buying Pressure	Buying pressure might be easing up – Time to take profits. When Dark blue happens stock starts to pull back	Is basically indicating selling pressure. More sellers than buyers	Selling pressure is easing up and over Buyers coming back in or steeping in.
